

John Laurence Mislang

Toronto, ON |

| contact.johnmislang@gmail.com | [LinkedIn](#)

SKILLS

- **Support & Networking:** System Troubleshooting, Technical Documentation, WIndows and Linux OS, Ticketing Systems, TCP/IP, DNS, Windows Server, Active Directory.
- **Programming & Technical Skills:** Java, Python, SQL, MySQL, Oracle, HTML/CSS, JavaScript (REST API, Fetch API), Node.js, Express, Websocket, Linux, Matlab, and Microsoft Office 365 (Excel, Word, PowerPoint, and Outlook).
- **Cybersecurity:** Network Forensics/Traffic Analysis (Wireshark, tcpdump, NetworkMiner), Threat Detection (IPS/IDS, SIEM), File Carving (bulk_extractor, Okteta), Risk Assessment, NIST Cybersecurity Framework.
- **AI & Frameworks:** Generative AI API Integration (OpenAI/ChatGPT), AI-assisted development (Copilot, Claude, Gemini), LLMs.
- **Languages:** English (Professional Proficiency), Filipino (Native), Ilocano (Fluent).

EDUCATION

York University - Bachelor of Arts (Honours) Information Technology

Sept. 2022 - June 2026

Summa Cum Laude

- **Relevant Coursework:** Network Security and Digital Forensics | IT Risk Management | Applied Data Communications and Networks | Applied Artificial Intelligence | Enterprise Architecture | Database Systems

TECHNICAL PROJECTS

Network Support & Forensics HomeLab - [View](#)

Sept. 2025 - March 2026

- Built and documented a dedicated virtual homelab to execute, analyze, and document cybersecurity exercises focusing on network forensics, threat detection, and file carving.
- Simulated different network attacks, including brute-force credential harvesting (Hydra) and passive Man-in-the-Middle ARP poisoning (dsniff) while analyzing the resulting traffic signatures in Wireshark and tcpdump.
- Simulated digital forensic investigations on raw disk images and packet captures, generating MD5 hashes to preserve chain of custody before carving artifacts and cleartext credentials using NetworkMiner, bulk_extractor, and Okteta.

Full Stack Portfolio Application - [View](#)

June 2025 - Nov. 2025

- Built a responsive personal portfolio using HTML, CSS, and JavaScript, with hash-based routing and dynamic components for smoother navigation, and added interactive features including a WebSocket test, theme toggle, and an animated on-page assistant.
- Developed a backend using Node.js, Express, and MongoDB to store datasets, run server-side logic, and handle API requests.
- Implemented a ChatGPT evaluation workflow that sends 150 questions to the API, resulting in an average of 86% answer accuracy and 420 ms response time, and stores the results in MongoDB.

SQL Database Architecture

Feb. 2025

- Designed an ERD and developed normalized relational schemas (1NF-3NF) to reduce redundancy and improve data consistency, and enforced data integrity through primary/foreign keys and referential integrity constraints.
- Built and populated relational tables with datasets simulating business operations.
- Wrote advanced SQL queries (JOIN, GROUP BY, subqueries, aggregate functions) in MySQL and Oracle to extract insights and generate reports.

Data Analytics & Predictive Modelling - [View](#)

Nov. 2024 - Dec. 2024

- Collaborated with a small team to analyze banking client data using Python (Pandas, NumPy, Matplotlib) to clean, visualize, and explore features.
- Built and evaluated a Decision Tree classifier (full vs. pruned) to predict high-income clients with roughly 94% precision by exploring entropy and information gain to identify the most influential features.
- Developed visualizations (scatter plots, histograms, bar charts) to highlight relationships between income, family size, education, loan acceptance, to be able to present them in a meaningful way.

EXPERIENCE

Costco - Inventory Management and Bakery Wrapper

Toronto, Ontario | May 2023 - July 2023

- Maintained strict adherence to safety protocols while thawing and preparing frozen goods.
- Collaborated with a 10+ member team to restock over 200 bakery items daily, ensuring 100% shelf availability.
- Wrapped and labeled over 100 freshly baked goods daily for front-of-house display in a fast-paced environment.

Cyber-Seniors - Seniors Mentor

Toronto, Ontario | Oct. 2020 - Jan. 2021

- Teamed up with peers to make 15+ fun video/web projects for seniors using tools such as Microsoft Suite.
- Delivered over 10 technology training sessions to seniors, improving digital literacy by around 70% based on participant surveys.
- Planned webinars and video tutorials about computers technologies and the internet for seniors.

ACHIEVEMENTS AND CERTIFICATIONS

- CompTIA Security+ Certificate Aug. 2025
- Google Cybersecurity Professional Certificate June 2025
- CompTIA Network+ Certificate In-Progress
