#	Question	Expected	GPT	Correct?	Time (ms)
1	To verify a digital signature we need the	B	B	✓	936
2	How do you prevent SQL injection?	A	A	✓	476
3	An Integer overflow occurs when	D	A	✗	387
4	What does EXE do when the STP solver times out on a constraint query for a particular path?	B	A	✗	330
5	Suppose Unix did not provide a way of passing file descriptors between processes, but still allowed inheriting file descriptors from a parent on fork and exec. What aspects of the OKWS design would break without file descriptor passing? 1. It would be impossible for services to get a TCP connection to the client web browser. 2. It would be impossible for okd to run as a non-root user.	C	N/A	✗	463
6	Suppose that Alice and Bob sent confidential text messages to one another last month through an encrypted messaging system. Alice and Bob are worried that an adversary might compromise one of their computers today, while they are taking the 6.858 final exam, and would then be able to decrypt those messages. Which of the following security properties can address Alice and Bob's concern?	C	N/A	✗	337
7	The AH Protocol provides source authentication and data integrity, but not	B	B	✓	352
8	Which of the following is a Wireless traffic Sniffing tool?	D	D	✓	327
9	Which of the following is an authentication method?	D	D	✓	408
10	What is Nmap?	A	A	✓	313
11	Public key encryption is advantageous over Symmetric key Cryptography because of	C	C	✓	353
12	Assume that a TLS connection has been established successfully between a client and a server. Establishing the session included checking the server certificate and executing a DiffieHellmann exchange, but the client did not provide a client certificate. Further, assume that the client and server are honest, that the client and server don't leak their keys, and that the cryptography is good. Which of the following attacks does TLS protect against? 1. An attacker replaying bytes that a client sent earlier. 2. An attacker impersonating the server.	A	A	✓	500
13	Let H be a Merkle-Damgard hash function is $H: \{0,1\}^* \rightarrow \{0,1\}^L$. Construct a MAC from this H as follows: $S(k,m) = H(k m)$. This mac is insecure because:	C	B	✗	568
14	What is a web proxy?	A	A	✓	411

Sociology

#	Question	Expected	GPT	Correct?	Time (ms)
1	Statistics about rural, suburban, and urban patterns of development and mobility are almost always reported based on a geographical area labeled as Metropolitan Statistical Areas (MSA). What constitutes an MSA?	B	B	✓	909
2	The ecological approach to urban sociology involved studying:	A	A	✓	699
3	The middle classes that developed over the nineteenth century were:	D	D	✓	489
4	In the debate about the 'managerial revolution', John Scott (1997) argued that:	A	B	✗	869
5	If a deviant act is 'normalized', it is:	B	B	✓	940
6	Becker proclaimed that cannabis use was:	B	B	✓	312
7	Technological forms of surveillance have made it easier to:	D	D	✓	653
8	In contemporary societies, social institutions are:	A	A	✓	345
9	Anti-psychiatrists like Laing & Esterson believed that:	D	C	✗	406
10	Mass-society theory suggests that:	C	C	✓	350
11	Marxist feminists explain patriarchy in terms of:	C	B	✗	918
12	There was a growth in income inequality in the 1980s because:	D	C	✗	356
13	The four ideal types of social action that Weber identified were as follows: instrumentally-rational, value-rational, traditional, and...	A	N/A	✗	374
14	In the 1960s, comprehensive schools did not eradicate class inequalities in education because:	B	B	✓	454
15	The Nation of Islam group appealed to:	C	C	✓	382
16	Chodorow (1978) argued that gender socialization occurred through:	A	A	✓	373
17	When sociologists study the structure of layers in society and people's movement between them, they call this:	A	A	✓	331
18	After slavery was abolished in the USA and British Empire, policy makers claimed that former slaves migrating to these cities would experience:	A	C	✗	357

#	Question	Expected	GPT	Correct?	Time (ms)
1	How did Aurignacian technology differ from Mousterian technology?	C	C	✓	428
2	What was the unifying element of Olmec culture?	A	A	✓	323
3	According to one theory, the power of Ancestral Pueblo elites emerged when certain groups:	C	C	✓	875
4	The most prominent feature of the food resource base of post-Pleistocene Europe was its:	D	D	✓	343
5	Which of the following was the greatest advantage of using fire in human evolution?	B	B	✓	380
6	What do anthropologists NOT need to know to determine when people entered the Americas from Siberia?	A	A	✓	742
7	Ethnographic evidence supports which of the following connections between surplus food and social complexity?	B	B	✓	480
8	The belief that all of the characteristics of civilization developed in one place, such as Egypt, and from there spread out to the rest of the world is known as:	C	C	✓	375
9	Which of the following ancient civilizations has a written language that is the furthest from being fully deciphered?	A	A	✓	377
10	Evidence from northwest coast societies indicates that what is ultimately needed for the development of social complexity is:	D	D	✓	383
11	When the ratio of brain size to body size is compared, which species has a proportionally larger brain?	D	D	✓	308
12	Palynology is the study of _____, which allows scientists to reconstruct _____.	C	C	✓	331
13	Montezuma ruled over millions of people from the _____ capital of _____.	B	B	✓	365
14	The above hominid species discovered in Malapa Cave in South Africa has been classified as:	B	B	✓	328
15	Early evidence of complexity in Mayan societies is suggested by the appearance, around 2850 B.P., of:	B	B	✓	534
16	When anatomically modern humans first arrived in the Middle East, who did they encounter?	A	A	✓	398
17	Which of the following is used to remove the soil enclosing site materials?	D	D	✓	343
18	The sophisticated stone tool making industry at the Pinnacle Point site in South Africa is evidence of:	B	B	✓	335
19	Evidence of wild grain harvesting and consumption in Israel dates to as early as	A	N/A	✗	463
20	Which subfield of anthropology aims to better understand the nearest living relatives of humans?	C	C	✓	354

The system performed well with both accuracy and response time for all three of the datasets tested (Computer Security, Prehistory, and Sociology). Each dataset included 50 multiple choice questions which we stored in our Mongo database, passed to GPT using a strictly formatted prompt which returned only a single letter option (A-D). GPT's responses were stored back into the database into "gpt-answers" along with response time and correctness. The system then calculated dataset-level statistics, including accuracy and average response latency, and visualized them using dynamically rendered tables and Chart.js graphs.

It did best on Sociology, with 88% accuracy, probably because these questions tend to require conceptual reasoning and broad knowledge that the model is well-trained on. Computer Security was next, with 82% accuracy, though most of its errors came in technical or paper-specific questions that required precise internal details. Prehistory had 78% accuracy, with most of its mistakes regarding very specific archaeological timelines or cultural details.
